

INTRODUCING JOB CORPS' ADVANCED TRAINING WEBSITE!

A **NEW** [Advanced Training website](#) is now available to provide students and career technical training instructors with a centralized information hub of Job Corps' Advanced Training programs by location, eligibility requirements and career opportunities, and instructor contact information for application details.

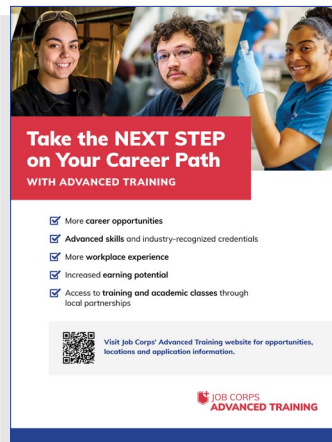

The screenshot shows the top of the website with a navigation bar for 'Industry Training Areas'. Below is a hero section with a photo of students and the text 'Take the NEXT STEP on your career path.' followed by a paragraph about the benefits of advanced training. A 'Benefits of Advanced Training' section lists four points: More career opportunities, Advanced skills and industry-recognized credentials, More workplace experience, and Increased earning potential. Below that is a 'Select an industry:' section with icons for 12 different fields: Advanced Manufacturing, Automotive and Machine Repair, Construction, Finance and Business, Health Care, Homeland Security, Hospitality, Information Technology, Renewable Resources and Energy, and Transportation.

The screenshot shows a detailed page for 'Advanced Welding' under the 'Advanced Manufacturing' category. It features a photo of a welder and a red header with the program name. Below the header, it lists 'POTENTIAL EARNINGS RANGE' as '\$40,518-\$71,240*' and 'OFFERED AT' as '6 JOB CORPS CENTERS'. The page includes sections for 'On the job, you will:' (listing tasks like joining metals and safety procedures), 'The credentials you'll earn:' (listing AWS and NIMS), 'Some of the career options you'll have:' (listing manufacturing, construction, etc.), and 'Requirements:' (listing high school diploma, written recommendation, health clearance, etc.). A small note at the bottom states: '*Salary information comes from the U.S. Department of Labor's Bureau of Labor Statistics, Occupational Employment and Wage Statistics Program and is provided for planning purposes only. Actual salary will depend on student skill level, credentials earned, experience level and location.'

Job Corps staff and instructors are encouraged to use this website as a resource when discussing Advanced Training opportunities with students.

The poster features the same hero image and text as the website home page. It includes a QR code and the text: 'Visit Job Corps' Advanced Training website for opportunities, locations and application information.' The Job Corps logo is at the bottom right.

[Advanced Training Poster](#)

To help promote Job Corps' Advanced Training website, this [poster](#) has been developed with a QR code to take students and staff directly to the website for more information. Posters are currently being printed and will be sent to centers when ready. In the meantime, centers are encouraged to download and print the poster, and display it in career training areas and classrooms so that students close to finishing their basic training can begin exploring Advanced Training opportunities in their career journey.

If you have any questions about this website, please e-mail jobcorpswebsites@mpf.com and a member of our website team will be in touch.

SIGN UP FOR STAFF TRAININGS

AT Ready: Preparing Students for Job Corps' Advanced Training Programs
Thursday, April 18, 2–3:30 p.m. CT

Staff will share an overview of the Advanced Training (AT) program as well as best practices for exposure, sending and receiving students, and will highlight recruitment strategies. There will also be a Q&A session at the end of the training as well as a demo of the new Advanced Training website.
